**DETAILED ACTION**

**REASONS FOR ALLOWANCE**

Claims 1-3 and 5-7 are allowed.

The following is an examiner's statement of reasons for allowance:

Su et al. and Scholl fail to disclose the combination of all the limitations recited, including an impact layer disposed substantially adjacent to a second doped layer and the absorption narrow bandgap layer, wherein the ratio of the ionization coefficient for electrons relative to the ionization coefficient for holes for the impact layer is larger than the corresponding ratio for the absorption narrow bandgap layer, the wide bandgap layer, the first doped layer, and the second doped layer.

Therefore, the amended limitations together with the overall structure of the high bandwidth semiconductor photodiode responsive to incident electromagnetic radiation is neither anticipated nor rendered obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
